Dover Publications Inc., United States, 2009. Paperback. Book Condition: New. Dover.. 198 x 127 mm. Language: English . Brand New Book. Science and religion are compatible, declares the famous physicist. In these essays, Einstein views science as the basis for a cosmic religion, embraced by scientists, theologians, and all who share a sense of wonder in the rationality and beauty of the universe. In the course of his career, Einstein wrote more than 300 scientific and 150 nonscientific publications. These essays date from the 1930s and 40s. In direct, everyday language the author develops a coherent view that transcends both the antiquated religion of fear and the modern religion of ethics. His concept of cosmic religion combines science and religion, with science forming the basis for a more enlightened religion. In these essays and aphorisms, Einstein also reflects on pacifism, disarmament, and Zionism. In addition to a brief biography of the author, this volume includes a warm appreciation by George Bernard Shaw.
