RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 56 pages. Original publisher: Moffett Field, Calif. : National Aeronautics and Space Administration, Ames Research Center ; Springfield, Va. : National Technical Information Service, distributor, 1991 OCLC Number: (OCoLC)60785800 Excerpt: . . . expressions involving vector fields. Section 5 describes an algorithm for generating explicitly integrable flows associated with nilpotent Lie algebras. Section 6 exploits the relation between Taylor series and trees to study a class of intrinsic numerical integrators. We begin in Section 2 with some background. The results surveyed here are the work of a variety of mathematicians: especially want to mention the contributions of my collaborators Peter Crouch, Matthew Grayson and Richard Larson. The work on algebras of trees and its applications to symbolic computation is joint work with Richard Larson. All of the algorithms described here rest upon this foundation. The work on explicitly integrable flows and nilpotent Lie algebras is joint work with Matthew Grayson. The work on numerical algorithms evolving on groups is joint work with Peter Crouch. 2 Background Consider a differential equation $\dot{x}(t) = E(x(t))u$ and $(x(t)), (0) \in E_p, N(1)$ where...

Reviews

It is fantastic and great. It generally is not going to cost an excessive amount of. You will like the way the blogger create this book.

-- **Gerardo Bauch PhD**

Extensive manual for publication fans. It is actually filled with knowledge and wisdom You can expect to like how the author compose this pdf.
