Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from The Alexander-Dewey Arithmetic: Intermediate Book This series of arithmetics arises from the realization that the mathematics taught in the schools of a democracy must function in: 1. Clear and independent thinking as a preparation for business, science and industry. 2. Skill in mathematical computation. 3. Civic responsibility which will carry into action whatever is needed for the welfare of the community. That these ends may be accomplished, new arithmetical ideas have been introduced by means of the socialized recitation, thus affording the pupil an impelling incentive, cultivation of initiative and judgment, and a desire to check results. The arithmetical ideas gained through this social introduction are made automatic through scientific practice which later culminates in their application to new concrete situations. Reviews are both constant and varied. Fully fifty percent of the work is to be performed without pencil. The subject matter is of contemporary interest which brings into the otherwise isolated schoolroom the great world where mathematics are found in every basic activity. The desideratum is an intelligent, responsible, skilful pupil. The respective contributions of the author and the editor of the series are perhaps sufficiently indicated by the use of these terms. The editor has not confined his attention to allowing the use of his name, but has made suggestions as to the underlying principles, has suggested experiments to be tested in schoolroom practice, has read and criticised the text and is jointly responsible for its present form. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the...
