Reviews

The most effective publication i ever study. I am quite late in start reading this one, but better then never. You wont sense monotony at whenever you want of your time (that's what catalogs are for concerning in the event you ask me).

(Prof. Erin Larson I)

DIE GRENZBOTEN (6, NO. 2)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 174 pages. Original publisher: Washington, D. C. : National Aeronautics and Space Administration, Scientific and Technical Information Branch ; Springfield, Va. : For sale by the National Technical Information Service, 1987. OCLC Number: (OCoLC)167808626 Subject: Measuring instruments -- Testing. Excerpt: . . . The third manifold system consisted of individual glass sampling canes located as shown in figure 3. These canes were constructed from 75-mm ID glass pipe identical to that used for the primary manifold. (See fig. 5.) A 20-cm section of pipe on a rate containing three sampling ports was located 4 m from the inlet. This 20-cm section then provided sampling ports similar to those used on the primary manifold. See CO and NO groups. Each inlet was a manifold of this type were provided for the proximately 6 m above the ground. A roots blower located on each cane at ground level provided continuous flow rates of 25 standard L sec. These individual sampling canes provided two important functions: The capability to sample ambient air with significantly less residence time in a manifold than available from the longer primary manifold and the capability for comparison of measurements from the individual canes with those obtained from the longer primary manifold. In addition, an exhaust manifold was provided and served as a waste line for all instrument exhausts including surplus gas flow from the gas dilution system. Its pumping source was a roots blower located at the exhaust and under trailer 2. (See fig. 3.) Dynamic gas dilution system. -An important component of the supporting facilities was the dynamic gas dilution system. The dilution system was a two-stage mass-flow-controlled system similar to that of reference 27. It was designed to operate over a dilution range of 106. The...
